HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Tunneling spectroscopy and high electrical resistivity in quasicrystalline alloys

Journal:	<i>Philosophical Magazine & Philosophical Magazine Letters</i>
Manuscript ID:	TPHM-05-Apr-0118.R1
Journal Selection:	Philosophical Magazine
Date Submitted by the Author:	28-Jun-2005
Complete List of Authors:	Delahaye, Julien Berger, Claire
Keywords:	tunnelling phenomena, quasicrystalline alloys, electronic transport, electronic spectroscopy, electronic density of states
Keywords (user supplied):	

Type I

Type III

Type III
