HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

**Study of longitudinal dynamics of trehalose-water solutions
by Inelastic Ultraviolet Scattering.**

Journal:	<i>Philosophical Magazine & Philosophical Magazine Letters</i>
Manuscript ID:	TPHM-06-May-0155
Journal Selection:	Philosophical Magazine
Date Submitted by the Author:	12-May-2006
Complete List of Authors:	Cesàro, Attilio; Università' di Trieste Gamini, Amelia; Università' di Trieste De Giacomo, Ornella; Università' di Trieste Masciovecchio, Claudio; Sincrotrone Trieste Gessini, Alessandro; Sincrotrone Trieste Di Fonzo, Silvia; Sincrotrone Trieste
Keywords:	amorphous materials, aqueous systems, glass transition
Keywords (user supplied):	ultraviolet inelastic scattering, trehalose, bioprotection
Note: The following files were submitted by the author for peer review, but cannot be converted to PDF. You must view these files (e.g. movies) online.
