HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L’archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

On page 70, Eq. 18 should read:

$$R_{ExL} = \begin{cases} R_{ExL0} & \text{for } u_z = 0 \\ r_{Ex} R_{ExL0} & \text{for } u_z > 0 \end{cases} \quad (\text{Eq. 18})$$

where R_{ExL0} is a constant value and r_{Ex} is the regulation factor.

On page 71, Table 1 should read:

Parameter	Value	Unit
k_B	$1.381 \cdot 10^{-23}$	$\text{J } ^\circ\text{K}^{-1}$
T	300	$^\circ\text{K}$
