Annotating Text With Local Grammars

Practical Uses

Éric Laporte

Sous la co-tutelle de : CNRS ÉCOLES PONTS PARISTECH ESIEE PARIS UPEM • UNIVERSITÉ PARIS-EST MARNE-LA-VALLÉE

Annotating Text With Local Grammars

Unitex/GramLab provides tools for inserting and modifying annotations in textHow to insert annotations?How to copy information into annotations?Where to place annotations?How to delete annotations?

Sous la co-tutelle de : CNRS ÉCOLE DES PONTS PARISTECH ESIEE PARIS UPEM • UNIVERSITÉ PARIS-EST MARNE-LA-VALLÉE

Outline

Insert annotations

Copy from text to annotation

Copy from a dictionary

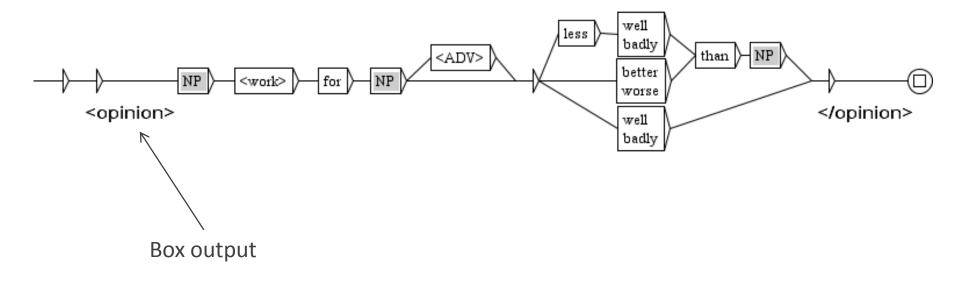

Annotate at the right place

Delete annotations

Sous la co-tutelle de : CNRS ÉCOLE DES PONTS PARISTECH ESIEE PARIS UNIVERSITÉ PARIS-EST MARNE-LA-VALLÉE

Inserting annotations

Iext DELA FSGraph Lexicon-Grammar XAlign File Edition Windows Help Info				
🗂 Locate Pattern 🛛				
Locate configuration Advanced options				
Locate pattern in the form of:				
O Regular expression:				
Graph: Set				
C Activate debug mode				
Index Grammar outputs				
Shortest matches Are not taken into account				
Longest matches Merge with input text				
All matches Replace recognized sequences				
Search limitation				
Stop after 200 matches SEARCH				
O Index all occurrences in text				
Search algorithm:				
Paumier 2003, working on text (quicker)				
 automaton intersection (higher precision) 				

Check the 'Merge with input text' option of Text > Locate Pattern

By default, box outputs are ignored

Sous la co-tutelle de : CNRS ÉCOLE DES PONTS PARISTECH ESIEE PARIS UPEM • UNIVERSITÉ PARIS-EST MARNE-LA-VALLÉE

Inserting annotations

It worked for my mental health better than any other drug \downarrow

<opinion>It worked for my mental health better than any other drug</opinion>

Clearly distinguish annotations from the original corpus
XML tags are a good solution for that
They are delimited by < > which are rarely used in normal
 text
Occurrences of '<' in the original text may be replaced by
 <</pre>

Dictionary-entry variables

Graphs with dictionary-entry variables must be applied:

- to the text automaton
- with the 'automaton intersection' option of Locate Pattern

Sous la co-tutelle de : CNRS ÉCOLE DES PONTS PARISTECH ESIEE PARIS UPEM • UNIVERSITÉ PARIS-EST MARNE-LA-VALLÉE

Dictionary-entry variables

 automaton intersection (higher precision) 			

All the preceding examples were with the Merge mode In this mode, Unitex tacitly copies the text it recognizes This is simple but does not copy in a different order We want to make copy explicit

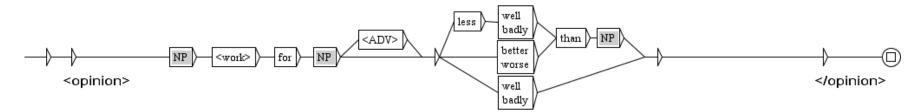

Sous la co-tutelle de : CNRS ÉCOLE DES PONTS PARISTECH ESIEE PARIS UPEM • UNIVERSITÉ PARIS-EST MARNE-LA-VALLÉE
