HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L’archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.
The Petit Larousse illustré is the only French dictionary to be updated every year, since it was first published in 1905 (coined 1906).

 Handy and affordable, with each edition selling several hundreds of thousands copies (Pruvost, 2002), one Petit Larousse may virtually be found in every French household.

 Editions published prior to 1948 are public domain according to French laws, however, no open full text resource is currently available.

WEB site

Targeting both scientific (linguists, historians, lexicographers, social scientists) and general public.

Simple and advanced research criteria, user friendly interface, responsive design.

Public release in July 2018 with 1906 to 1924 editions, then new data will be regularly added.

TEI XML

Reference digital edition format. For long-term preservation and expert querying.

Users: digital humanists, computational linguists.

The use of TEI-LEXO format (Banski et al., 2017) will allow for a predictable structure and for the exploitation of ad hoc digitisation technologies such as GROBID-Dictionaries (Khemakhem et al., 2017)

Ontolex-Lemon RDF

Natural language processing applications and linking to other resources.

Users: language technologists, computer scientists.
