Submitted on 17 Dec 2019

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L’archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.
**Development of an integrated and interdisciplinary heritage science**

**Challenges**
Patrimalp aims to:
- Develop an interdisciplinary scientific community at the heart of Univ. Grenoble Alpes
- Create innovative heritage research methods
- Initiate an interdisciplinary academic course on heritage
- Support heritage and culture policies
Carrying out these goals will strongly contribute to the attractiveness and international outreach of Univ. Grenoble Alpes.

**A cross-disciplinary project**
- history of art
- archaeology
- material sciences
- geosciences
- restoration and conservation
- computing sciences
- geography

**Case studies**
- Antic Theater of Lyon
- Epigraphical stone of Vaison-la-Romaine
- Saint-Michel de Connexe Priory
- Costumes and Jewelleries in the Alps
- Brocadess transposed
- Neolithic rock art sites (Rocher du Château, Trou de la Féclaz)

**Purpose**
- **WP1 - Raw matter resources and contextualisation**
  - **PURPOSES:**
    - Identification of raw materials used in the processing of artefacts
    - Socio-ecosystemic contextualization of raw material strategies and rock art production

  - **Scientific and technological challenges**
    - Natural and cultural context
    - Archaeological context
    - Rock weathering
    - Natural resources
    - Trajectories of supplying strategies

  - **Time and space**
    - The innovativ approach developed by Patrimalp consortium is based on carefully selected case studies carried out in the West Alpine region and Rhône corridor, from the Neolithic period to the pre-industrial period.

**Scientific bottlenecks**
- Reconstitute the different “states” of the artefact
- Develop an ultimate integrated physico-chemical analysis of artefacts
- Understanding artefact materials through a selective analysis method
- Dealing with, organising and sustaining heterogeneous multidisciplinary data
- Write the history of artefacts
- Production of a common story of the artefact across the time in its environmental and cultural context

**WP2 - Materials, manufacturing process and alteration**
- **PURPOSES:**
  - Identification and characterization of constituting matters of artefacts
  - Understanding their manufacturing and alteration

  - Cultural heritage matter as a “recorder” of artistic human past activities
  - Identification of «clues» inside the matter

**WP3: History, life and trajectories of artefacts**
- **PURPOSES:**
  - Artefact story in native cultural context
  - Understanding the artefact as artistic and cultural technical clue
  - Spatial and temporal following tracks

- **Scientific approach**
  - Historiography of artefact
  - History of artefact (primary and secondary sources, workshops, treatises, literature)
  - Form and creation life
  - Artistic cartography

**WP4 - Modelling and interconnected visualisation of cultural heritage**
- **PURPOSES:**
  - Modelling knowledge and reasoning about heritage artefacts, their components and context
  - Geovisualisation
  - Restitution and rendering

**Visualisations**
- Textures, spatial, chronological, upgradable, interactive, 2D, 3D, augmented reality...
