HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

J. Physique Lett. **36** (1975) L-301

**TUNNELLING INVESTIGATION OF THE PHONON SPECTRUM OF SUPERCONDUCTING Be
IMPLICATIONS FOR AN EVENTUAL ENHANCEMENT OF T_c (*)**

A. LÉGER, J. KLEIN, S. DE CHEVEIGNE, M. BELIN and D. DEFOURNEAU

— In the conclusion of the paper, the last sentence of the first paragraph should read : « Recently a promising T_c increase has also been obtained by this method in the case of Al, a standard weak-coupling superconductor [18]. »

— Reference [18] should read :
